

COVID-19 RESPONSE FOR SUSPECTED & CONFIRMED CASES

Campers & Staff

	DAY CAMP CAMPERS	OVERNIGHT CAMPERS & ALL STAFF	CLOSE CONTACTS	ALL OTHER CAMPERS, STAFF, AND FAMILIES
<p>NON-COVID ILLNESS < 24 HOURS</p> <p>Individual has non-COVID symptoms, or only 1 COVID symptom that lasts for less than 24 hours with no known exposure</p>	<ul style="list-style-type: none"> ● Must stay home ● May return if symptoms resolve within 24 hours 	<ul style="list-style-type: none"> ● Remain in health center and monitor symptoms ● May return to activities if symptoms resolve within 24 hours ● Parents notified 	<ul style="list-style-type: none"> ● Monitor for symptoms 	
<p>NON-COVID ILLNESS > 24 HOURS</p> <p>Individual has non-COVID symptoms that last for 24 hours or more and no known exposure to COVID-19</p>	<ul style="list-style-type: none"> ● Must stay home ● May return when individual is symptom-free for 24 hours 	<ul style="list-style-type: none"> ● Remain in health center and monitor symptoms ● If symptoms not resolved in 24 hours, must go home ● Remain isolated until pick-up ● May return if symptom-free for 24 hours ● Staff without local home may stay at camp in isolation until recovered 	<ul style="list-style-type: none"> ● Monitor for symptoms 	
<p>COVID SYMPTOMS OR CONFIRMED POSITIVE</p> <p>Individual has symptoms of COVID-19 or has tested positive</p>	<ul style="list-style-type: none"> ● Must stay home or isolate until pick-up ● Health center staff notified ASAP ● Trace close contacts ● Rapid test at camp 	<ul style="list-style-type: none"> ● Must go home ● Health center staff notified ASAP ● Isolate in health center until pick-up ● Staff without local home 	<ul style="list-style-type: none"> ● Notified (maintain confidentiality) ● Unvaccinated close contacts (staff and campers) must go home ● Vaccinated campers and 	<ul style="list-style-type: none"> ● Notified (maintain confidentiality) ● Provide COVID Fact Sheet

	<ul style="list-style-type: none"> • Contact health care provider about PCR testing • See notes below about return after illness • Public Health must be notified 	<p>may stay at camp in isolation until recovered</p> <ul style="list-style-type: none"> • Trace close contacts • Rapid test at camp • Contact health care provider about PCR testing • See notes about return after illness • Public Health must be notified 	<p>staff can stay at camp</p> <ul style="list-style-type: none"> • Staff without local home may stay at camp in quarantine • Provide COVID Fact Sheet • Follow Public Health guidelines for quarantine and testing • See notes about return after exposure 	
<p>EXPOSURE TO CONFIRMED POSITIVE Individual has a known exposure to someone confirmed to have COVID-19 (see definition of close contact) <i>Applies even for those who are vaccinated</i></p>	<ul style="list-style-type: none"> • If unvaccinated, must stay home • Vaccinated campers can remain at camp • Health center notified ASAP • Follow Public Health guidelines for quarantine & testing • See notes about return after exposure 	<ul style="list-style-type: none"> • If unvaccinated, must go home • Vaccinated campers and staff can remain at camp • Health center staff notified ASAP • Isolate in health center until pick-up • Staff without local home may stay in quarantine at camp • Follow Public Health guidelines for quarantine and testing • See notes about return after exposure 	<ul style="list-style-type: none"> • Notified if the individual tests positive (maintain confidentiality) 	<ul style="list-style-type: none"> • Notified if the individual tests positive (maintain confidentiality)

Close Contact Definition:

- An individual within 6 feet of a person who has been confirmed positive for COVID-19 for a combined total of 15 minutes over a 24-hour period. Close contact also occurs if someone coughs on, kisses, or shares utensils with the individual or if they come into contact with the individual's body fluids.

What to do if you are exposed to someone confirmed to have COVID-19:

- Get tested for COVID-19: Recommended testing is at least 5-7 days after exposure, or if symptoms develop.
- Quarantine: Close contacts of confirmed cases should remain away from others and watch for symptoms. At least 10 days of quarantine is recommended.
- If no symptoms develop, the individual may return to camp. A negative test is required to return to camp; the test must be a minimum of 5 days after the exposure.
- Note: If fully vaccinated, no quarantine is required. It is still recommended to watch for symptoms and test 5-7 days after exposure.

Returning to camp after COVID-19:

- A person who tested positive for COVID-19 (confirmed case) may return when it has been:
 - 10 days since symptoms began
 - AND at least 24 hours fever-free (without fever-reducing medication)
 - AND symptoms have improved
 - AND a health care provider gives a written note stating that the individual may safely return
- A person who tests positive but never developed symptoms may return when it has been at least 10 days since they first tested positive.
- A person who had COVID-19 symptoms but who tested negative may return when it has been:
 - At least 24 hours fever-free (without fever-reducing medications)
 - AND symptoms have improved
 - AND documentation of the negative test result has been provided

Public Health - Seattle & King County

Confirmed or suspected cases of COVID-19 at camp must be reported to Public Health - Seattle & King County. Report by calling 206 477 3977 between 8am and 7pm or by using the online COVID intake form.

Program Closure

Camp Sealth will consider closing our program if multiple positive cases arise in separate groups or cohorts, or if advised by Public Health - Seattle & King County.
